DETAILED ACTION

1. Applicants' Preliminary Amendment, received 17October2003, is acknowledged. Claims 1-30 and 52-87 have been cancelled.

1. Claims 31-51 are drawn to multiple inventions, i.e., either polypeptide compositions or polynucleotide compositions and methods. Therefore, each of these claims has been placed into multiple inventions, directed either to polypeptide or polynucleotide, but not to both. Upon election, applicants are required to amend the claims to either polypeptide or polynucleotide as appropriate.

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 31-33 and 35-43, drawn to DNA compositions, classified in class 536, subclass 23.7.
 - II. Claims 31, 32, 34 and 44-51, drawn to polypeptide compositions, classified in class 424, subclass 234.1.

The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are drawn to functionally and structurally distinct molecules.

Invention I is drawn to nucleotides while Invention II is drawn to polypeptides.

Because these inventions are distinct for the reasons given above, have acquired a separate status in the art as shown by their different classification, and because while the searches may overlap, the searches are not coextensive, restriction for examination purposes as indicated is proper.

Election of Species

This application contains claims directed to the following patentably distinct species of the claimed invention: the sequences listed in claims 39-43 and 48-51.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, claims 31-38 and 44-47 are generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Art Unit: 1645

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
